Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 (Before Applying)	Stage 2 (During Application)	Stage 3 (After Prediction)
Actions <i>What does the customer do?</i>	• Searches for suitable credit card options. • Checks eligibility requirements. • Collects necessary personal and financial information.	• Opens the Credit Card Approval Prediction application. • Enters applicant details. • Submits the application for prediction.	• Views the prediction result. • Understands whether the application is likely to be approved or rejected. • Plans the next steps based on the prediction.
Touchpoint <i>What part of the service do they interact with?</i>	• Bank Website • Credit Card Information Portal • Customer Support	• Flask Web Application • Applicant Information Form • Prediction Button	• Prediction Result Page • Approval/Rejection Message • Home/Predict Again Button

Customer Thought <i>What is the customer thinking?</i>	• Am I eligible for a credit card? • Which card should I choose? • What documents are required?	• I hope I entered all details correctly. • Will my application be approved? • Is the prediction accurate?	• What should I do if my application is rejected? • Can I improve my eligibility? • The prediction was quick and helpful.
Customer Feeling <i>What is the customer feeling?</i>	Curious and Hopeful	Anxious and Expectant	Satisfied (if approved) or Motivated to Improve (if rejected)
Process Ownership <i>Who is in the lead on this?</i>	Customer	Customer & Prediction System	Prediction System & Bank
Opportunities <i>How can we improve this stage?</i>	• Provide clear eligibility guidelines. • Explain required documents. • Offer eligibility checking before applying.	• Design a simple and user-friendly application form. • Validate user inputs before prediction. • Provide instant prediction.	• Give suggestions for improving eligibility. • Display prediction results clearly. • Enable users to submit a new prediction easily.
