

Code-Layout, Readability and Reusability

Date	07 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Consistent indentation followed in Python notebook and Flask application.
2	Proper File Structure	Files and folders are logically organized	Yes	Project organized into Dataset, Model, Notebook, Templates, Static, and Flask files.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Descriptive variable names improve readability and maintenance.
4	Function / Method Names	Functions are descriptively named	Yes	Functions such as home(), predict(), and result() clearly indicate their purpose.
5	Code Comments	Inline and block comments explain logic	Yes	Comments are included throughout the notebook and application code.
6	Modular Design	Code is split into reusable functions/modules	Partial	Notebook is divided into logical steps; Flask routes and saved model improve modularity.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unnecessary and duplicate code has been removed.

8	Error Handling	Exceptions and errors are handled gracefully	Yes	Flask application uses try-except blocks to handle runtime errors.
---	----------------	--	-----	--

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Data Preprocessing Module	Python, Pandas	Model Training & Prediction	High
2	Label Encoder Module	Scikit-learn	Data-Encoding During Prediction	High
3	Logistic Regression Model	Scikit-learn	Flask Web Application	High
4	Flask Application (app.py)	Python, Flask	Web Deployment	High
5	HTML Templates	HTML, CSS	User Interface	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized project structure with separate folders for datasets, models, notebooks, templates, and static files.
Readability	5	Meaningful variable names, proper indentation, and comments improve readability.
Reusability	4	Model, preprocessing, and Flask components can be reused in similar ML applications.
Documentation / Comments	5	Notebook and application include comments explaining major steps.
Overall Score	4.8/5	The project follows good coding standards with maintainable and reusable components.
