

No. of Functional Features Included in the Solution

Date	15 March 2024
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Data Loading	Loads applicant and credit datasets for processing.	Data Processing	Done	High
2	Data Preprocessing	Cleans, merges, encodes, and prepares the dataset for model training.	Data Processing	Done	High
3	Machine Learning Model	Trains and evaluates multiple ML models and selects the best model.	Model Development	Done	High
H4	Credit Card Approval Prediction	Predicts whether an application is Approved or Rejected.	Prediction Engine	Done	High
5	Flask Web Application	Provides a web interface for users to enter applicant details.	Frontend & Backend	Done	High
6	Model Integration	Loads the trained model (best_model.pkl) and performs real-time prediction.	Backend	Done	High
7	Result Display	Displays the prediction result to the user through the web application.	User Interface	Done	High
8	Error Handling	Handles invalid inputs and runtime exceptions using Flask.	Backend	Done	High

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Applicant Details Form, Prediction Result Page
2	Backend / Logic	4	Data Preprocessing, ML Prediction, Model Loading, Error Handling
3	Database / Storage	1	CSV Datasets & Pickle Model Files
4	API / Integration	1	Flask Route Integration
5	Security / Authentication	0	Not Implemented (Prototype Application)
